

# sprint 1 note

Date 15/7

## Participants

@niloofar Bahramzade [developers](#)

## Goals

- building a landing page
- user database
- user controller
- user sign in/up
- user management

## Discussion topics

Time	Item	Presenter	Notes
	UI/UX challenge	@front1	<ul style="list-style-type: none"><li>• design had been checked for color blind people</li><li>• brand color</li><li>• brand font</li></ul>
	defining DB structure	@dev1	<ul style="list-style-type: none"><li>• SQL for start</li><li>• lang: mySQL</li><li>• postgressSQL</li><li>• need optimization</li></ul>
	problem with controller	@dev1	<ul style="list-style-type: none"><li>• need another week(plus the predefined deadline)</li></ul>
	user sign in/up	@front2	<ul style="list-style-type: none"><li>• new bug: it is hard to handle android version lower than 8</li></ul>
	user management	@manager1	<ul style="list-style-type: none"><li>• defining policies for users</li></ul>

## Action items

- ☒ user sign in/up to another android developer @dev3
- ☐ user controller to [developers](#) ( @niloofar Bahramzade )@dev2

## Decisions

sql vs no-sql

🔧 should we support lower version of android?

🔧 landing page details

🔧 DB structure

🔧 user policies
